Title: Handheld Medical Reference Application With Integrated Dosage Calculator
Applicants: Mark Rosenbloom, M.D.
Filed: January 26, 2004
Attorney Docket No.: 8793/91303

Sheet 2 of 4 Sheets

Sending Application	Receiving Application	Protocol	CreatorID	Type	Parameter String	Interpretation
Reader	Conversion Calc	palm	Pcnv	libr	[category= <categoryname>]	Launch the Conversion Calculator. If the parameter string is present, then <category> specifies which category of conversions to load (i.e. Distance, Temperature, Volume, Weight, Pressure) *Example: Pcnv.libr?category=Distance*
Reader	Conversion Calc	palm	Pcnv	libr	calc=USToSI[&test= <testname>]	Launch the USToSI Calculator. If '&test=<testname>' is present, then <testname> specifies which test to load. Else, then the first test is loaded. *Example: Pcnv.libr?calc=USToSI&test=Amylase*
Reader	DMA	palm	Pepd	appl	calc=druginter[&sel ect=<druglist>]	Launch the Drug Interactions Calculator. If '&select=<druglist>' is present, then <druglist> consists of a comma-delimited list of names of drugs to pre-select. *Example: Pepd.appl?calc=druginter&select=Foltx,Primidone*
Reader	DMA	palm	Pepd	appl	calc=gencalc[&id= <calcid>]	Launch the Generic Calculator. If '&id=<calcid>' is present, then <calcid> is the 4 character calculator id of the calculator to load. Else, the first calculator is loaded. *Example: Pepd.appl?calc=gencalc&id=coma*
Reader	DMA	palm	Pepd	appl	calc=narcotics	Launch the Narcotics Conversion Calculator. *Example: Pepd.appl?calc=narcotics*

Sheet 3 of 4 Sheets

| Sending Application	Receiving Application	Protocol	CreatorID	Type	Parameter String	Interpretation
Reader	Reader	palmcall	Prdr	libr	section=<name>& <sectionlist>	Display a drop-down menu. The <name> parameter specifies which section to select and corresponds to the name attribute of the associated HTML anchor tag. The <sectionlist> parameter is an ampersand-delimited list of sections within the current page. Each item in the list takes the form '<name>=<displayname>', where <name> corresponds to the name attribute of the associated HTML anchor tag, and <displayname> is the associated text to display in the drop-down menu. *Example: Prdr.libr?section=dos&dos=Dosing&kin=Kinetics*
